Landscape Maintenance

Jackson, Wyoming

# Our Story

Boreal Property Management is a family operated full-service property care company. We provide timely, expert, and cost-effective year round home care.

Our team is well versed in all aspects of estate management. You can depend on timely and quality home and property care from us. As your long-term provider, we will develop a relationship with you for years to come. We wish to meet and exceed your expectations through out the seasons.

We provide cost conscious, environmentally aware consultations on landscaping, design, weed eradication, snow removal, irrigation, arbor, and other landscape maintenance programs.

Our caretaking skills include a full range of ancillary services from weekly house checks to mail pick up and forwarding, trash removal, and contractor coordination. Boreal can help you define what your needs are and create a service plan that works best for your family. Our staff is the most knowledgeable in Jackson Hole.

Our team has years of estate management and horticultural experience with a Landscape Certified Manager, LICT- Lawn Care, Arborist, Irrigation Contractor, and Irrigation Auditor Certification.

# Landscape Installation

Boreal is a design-build landscape installation company. With a team of 45 talented, experienced landscapers, Boreal has been installing livable, natural, beautiful landscapes that co-exist with wild Jackson for over 10 years.

Boreal provides clients with environmentally aware consultation on landscaping, design, weed eradication, irrigation, flowering and organic programs.

## Landscape Installation New Homeowner Landscape Redesign

Boreal's landscaping expertise and service is unmatched in the region. When new homeowners needed a complete overhaul of their previous landscape, they turned to Boreal.

Boreal provided the homeowners with a vision of their new landscape that was best suited for the weather and wildlife. Boreal carefully selected every tree, perennial, and shrub to work in this environment; providing a layout that was mindful of the grazing Moose seeking aspen that might disturb the flowerbeds and ensured the landscaping took into account the migration patterns of the hundreds of elk that cross the valley annually. The redesign also helped maximize the existing irrigation system to help reduce waste.

# Landscape Installation

## New Landscape Installation

We believe that a landscape is an extension of the home and should reflect the vision and spirit of the homeowners. Boreal was selected for the landscape installation of a premier home at the top of Bar B-C Ranch. Our project manager described our focus for the project with Homestead Magazine, "The landscape plan was to be an evolving one that created a seamless transition from wild Wyoming to a Jackson Hole outdoor living space."

Boreal provided additional landscape design support through out the project, creating breathtaking water features that were weaved into the hardscapes surrounding the home. The final result, a sustainable landscape that enhanced the natural beauty and views that surrounded the property.
